GUIDE

HOW TO USE THIS PROMPT BOOK

100 personalised caricature & chibi character image prompts — each with 6 variable slots. Replace the **[TOKENS]** with your details and paste into any AI image tool.

HOW TO USE — 4 STEPS

- 1 **Each prompt contains 6 personal variables** shown in **[SQUARE BRACKETS]** — such as **[NAME]** **[PERSONALITY]** **[ROLE]** etc. Replace each with your own details before using.
- 2 **Browse the 100 prompts** grouped into 5 categories. Find one that matches the look you want to create — each is a complete image generation prompt.
- 3 **Copy the prompt text** and replace every **[TOKEN]** with your personal detail. See the example below — it shows a blank template next to the same prompt fully filled in.
- 4 **Paste the completed prompt** into ChatGPT, Midjourney, Adobe Firefly, or DALL·E 3. The preamble at the top helps the AI understand each variable before it reads the creative prompt.

YOUR 6 VARIABLES — WHAT EACH MEANS

[NAME]	Character's name	[PERSONALITY]	Dominant personality trait
[ROLE]	Character's job or archetype	[PROP]	Signature prop or object
[STYLE]	Animation/art style	[OUTFIT]	Character's clothing

No photo needed for some tools. Midjourney and Firefly generate images from text alone. For ChatGPT, upload your photo alongside the prompt for best results.

Tip: The preamble at the start of each prompt (the variable definitions) helps the AI understand your values before reading the creative prompt — always keep it when copying.

EXAMPLE — PROMPT #1 — TEMPLATE VS FILLED-IN

TEMPLATE (UNFILLED)

A Pixar 3D animated character portrait of **[NAME]**, a **[PERSONALITY]** **[ROLE]** rendered in warm Pixar studio lighting. **[NAME]** wields **[PROP]** with casual confidence, dressed in **[OUTFIT]**, styled in **[STYLE]**.

FILLED-IN EXAMPLE (TOKENS REPLACED WITH YOUR DETAILS)

A Pixar 3D animated character portrait of **ZARA**, a **wildly optimistic scientist** rendered in warm Pixar studio lighting. **ZARA** wields **a glowing test tube** with casual confidence, dressed in **a rumpled lab coat**, styled in **Pixar 3D animation**.

↑ **Accent tokens** = what to replace. **Green text** = example values filled in. Copy the prompt, swap every bracketed token for your own detail, and paste into your AI image tool.
