GUIDE

HOW TO USE THIS PROMPT BOOK

100 personalised cinematic movie poster image prompts — each with 6 variable slots. Replace the **[TOKENS]** with your details and paste into any AI image tool.

HOW TO USE — 4 STEPS

- 1 **Each prompt contains 6 personal variables** shown in **[SQUARE BRACKETS]** — such as **[NAME]** **[ROLE]** **[OUTFIT]** etc. Replace each with your own details before using.
- 2 **Browse the 100 prompts** grouped into 5 categories. Find one that matches the look you want to create — each is a complete image generation prompt.
- 3 **Copy the prompt text** and replace every **[TOKEN]** with your personal detail. See the example below — it shows a blank template next to the same prompt fully filled in.
- 4 **Paste the completed prompt** into ChatGPT, Midjourney, Adobe Firefly, or DALL·E 3. The preamble at the top helps the AI understand each variable before it reads the creative prompt.

YOUR 6 VARIABLES — WHAT EACH MEANS

[NAME] Character or actor name	[ROLE] Character's role or archetype
[OUTFIT] Character's costume	[GENRE] Film genre
[PALETTE] Colour palette & mood	[TAGLINE] Film tagline text

No photo needed for some tools. Midjourney and Firefly generate images from text alone. For ChatGPT, upload your photo alongside the prompt for best results.

Tip: The preamble at the start of each prompt (the variable definitions) helps the AI understand your values before reading the creative prompt — always keep it when copying.

EXAMPLE — PROMPT #1 — TEMPLATE VS FILLED-IN

TEMPLATE (UNFILLED)

A cinematic movie poster for a **[GENRE]** film:
[NAME] as **[ROLE]** in **[OUTFIT]** stands
with back to the viewer on a rain-soaked
neon-lit city street at 2am.
[PALETTE] with neon reflected in wet
pavement. Tagline: '**[TAGLINE]**'.

FILLED-IN EXAMPLE (TOKENS REPLACED WITH YOUR DETAILS)

A cinematic movie poster for a **noir thriller**
film:
Alex Morgan as **a rogue spy** in **a tailored black suit** stands
with back to the viewer on a rain-soaked
neon-lit city street at 2am.
Dark and moody, deep blues and crimson with neon
reflected in wet
pavement. Tagline: '**Trust no one. Run.**'.

↑ **Accent tokens** = what to replace. **Green text** = example values filled in. Copy the prompt, swap every bracketed token for your own detail, and paste into your AI image tool.

#1 *Rain-slicked street · action-thriller heroic framing*

We'll be creating an AI image prompt.
First, let's define some variables.
