GUIDE

HOW TO USE THIS PROMPT BOOK

100 personalised vintage scrapbook & retro image prompts — each with 6 variable slots. Replace the **[TOKENS]** with your details and paste into any AI image tool.

HOW TO USE — 4 STEPS

- 1 Each prompt contains 6 personal variables shown in **[SQUARE BRACKETS]** — such as **[NAME]** **[STYLE]** **[ERA]** etc. Replace each with your own details before using.
- 2 Browse the 100 prompts grouped into 5 categories. Find one that matches the look you want to create — each is a complete image generation prompt.
- 3 Copy the prompt text and replace every **[TOKEN]** with your personal detail. See the example below — it shows a blank template next to the same prompt fully filled in.
- 4 Paste the completed prompt into ChatGPT, Midjourney, Adobe Firefly, or DALL·E 3. The preamble at the top helps the AI understand each variable before it reads the creative prompt.

YOUR 6 VARIABLES — WHAT EACH MEANS

[NAME]	Subject's name	[STYLE]	Photo/art style
[ERA]	Historical era or decade	[OUTFIT]	Period-appropriate clothing
[SETTING]	Location or backdrop	[OCCASION]	Event or life moment

No photo needed for some tools. Midjourney and Firefly generate images from text alone. For ChatGPT, upload your photo alongside the prompt for best results.

Tip: The preamble at the start of each prompt (the variable definitions) helps the AI understand your values before reading the creative prompt — always keep it when copying.

EXAMPLE — PROMPT #1 — TEMPLATE VS FILLED-IN

TEMPLATE (UNFILLED)

A **[STYLE]** Kodachrome photograph of **[NAME]** in **[ERA]**, wearing **[OUTFIT]**, sitting on a sun-drenched **[SETTING]** with wind-tossed hair — **[OCCASION]** perfectly preserved on film. Authentic film grain, soft vignette, faded warm tones.

FILLED-IN EXAMPLE (TOKENS REPLACED WITH YOUR DETAILS)

A faded Kodachrome colour Kodachrome photograph of DOROTHY in 1960s, wearing a mod miniskirt and white go-go boots, sitting on a sun-drenched seaside promenade with wind-tossed hair — a summer holiday perfectly preserved on film. Authentic film grain, soft vignette, faded warm tones.

↑ **Accent tokens** = what to replace. **Green text** = example values filled in. Copy the prompt, swap every bracketed token for your own detail, and paste into your AI image tool.
