GUIDE

HOW TO USE THIS PROMPT BOOK

100 personalised pet transformation portrait image prompts — each with 6 variable slots. Replace the [TOKENS] with your details and paste into any AI image tool.

HOW TO USE — 4 STEPS

- 1 Each prompt contains 6 personal variables shown in [SQUARE BRACKETS] — such as [PET NAME] [BREED] [COAT] etc. Replace each with your own details before using.
- 2 Browse the 100 prompts grouped into 5 categories. Find one that matches the look you want to create — each is a complete image generation prompt.
- 3 Copy the prompt text and replace every [TOKEN] with your personal detail. See the example below — it shows a blank template next to the same prompt fully filled in.
- 4 Paste the completed prompt into ChatGPT, Midjourney, Adobe Firefly, or DALL·E 3. The preamble at the top helps the AI understand each variable before it reads the creative prompt.

YOUR 6 VARIABLES — WHAT EACH MEANS

[PET NAME]	Your pet's name	[BREED]	Breed or species
[COAT]	Coat colour and texture	[THEME]	Creative transformation theme
[PROP]	Prop or accessory	[SETTING]	Background or location

No photo needed for some tools. Midjourney and Firefly generate images from text alone. For ChatGPT, upload your photo alongside the prompt for best results.

Tip: The preamble at the start of each prompt (the variable definitions) helps the AI understand your values before reading the creative prompt — always keep it when copying.
