GUIDE

HOW TO USE THIS PROMPT BOOK

100 personalised childhood nostalgia portrait image prompts — each with 6 variable slots. Replace the **[TOKENS]** with your details and paste into any AI image tool.

HOW TO USE — 4 STEPS

- 1 **Each prompt contains 6 personal variables** shown in **[SQUARE BRACKETS]** — such as **[NAME]** **[AGE]** **[HAIR]** etc. Replace each with your own details before using.
- 2 **Browse the 100 prompts** grouped into 5 categories. Find one that matches the look you want to create — each is a complete image generation prompt.
- 3 **Copy the prompt text** and replace every **[TOKEN]** with your personal detail. See the example below — it shows a blank template next to the same prompt fully filled in.
- 4 **Paste the completed prompt** into ChatGPT, Midjourney, Adobe Firefly, or DALL·E 3. The preamble at the top helps the AI understand each variable before it reads the creative prompt.

YOUR 6 VARIABLES — WHAT EACH MEANS

[NAME]	Child's first name (in capitals)	[AGE]	Age description of the child
[HAIR]	Hair colour and style	[ERA]	Decade or era for the aesthetic
[ACTIVITY]	What the child is doing	[SETTING]	Location or environment

No photo needed for some tools. Midjourney and Firefly generate images from text alone. For ChatGPT, upload your photo alongside the prompt for best results.

Tip: The preamble at the start of each prompt (the variable definitions) helps the AI understand your values before reading the creative prompt — always keep it when copying.
