VARIABLES

GUIDE

HOW TO USE THIS PROMPT BOOK

100 personalised product photography image prompts — each with 6 variable slots. Replace the **TOKENS** with your details and paste into any AI image tool.

HOW TO USE — 4 STEPS

- 1 Each prompt contains 6 personal variables shown in **[SQUARE BRACKETS]** — such as **[PRODUCT]** **[TYPE]** **[MATERIAL]** etc. Replace each with your own details before using.
- 2 Browse the 100 prompts grouped into 5 categories. Find one that matches the look you want to create — each is a complete image generation prompt.
- 3 Copy the prompt text and replace every **[TOKEN]** with your personal detail. See the example below — it shows a blank template next to the same prompt fully filled in.
- 4 Paste the completed prompt into ChatGPT, Midjourney, Adobe Firefly, or DALL·E 3. The preamble at the top helps the AI understand each variable before it reads the creative prompt.

YOUR 6 VARIABLES — WHAT EACH MEANS

[PRODUCT]	Product name or brand	[TYPE]	Product category or type
[MATERIAL]	Primary material or finish	[BACKGROUND]	Background or surface
[LIGHTING]	Lighting style	[ANGLE]	Camera angle or framing

No photo needed for some tools. Midjourney and Firefly generate images from text alone. For ChatGPT, upload your photo alongside the prompt for best results.

Tip: The preamble at the start of each prompt (the variable definitions) helps the AI understand your values before reading the creative prompt — always keep it when copying.

EXAMPLE — PROMPT #1 — TEMPLATE VS FILLED-IN

TEMPLATE (UNFILLED)

A commercial product photograph of **[PRODUCT]**,
a **[TYPE]** made of **[MATERIAL]**, positioned
on **[BACKGROUND]**. The product is centered
and perfectly in focus. **[LIGHTING]**
eliminates harsh shadows.
Shot **[ANGLE]**.

FILLED-IN EXAMPLE (TOKENS REPLACED WITH YOUR DETAILS)

A commercial product photograph of **LUMINA Serum**,
a **skincare bottle** made of **dark amber glass**,
positioned
on **pure white background**. The product is
centered
and perfectly in focus. **Soft diffused studio
lighting**
eliminates harsh shadows.
Shot **45-degree hero angle**.

↑ **Accent tokens** = what to replace. **Green text** = example values filled in. Copy the prompt, swap every bracketed token for your own detail, and paste into your AI image tool.

#1 *E-commerce clean shot · material texture colour accuracy*

We'll be creating an AI image prompt.
First, let's define some variables.

"[PRODUCT]" is Product name or brand.
"[TYPE]" is Product category or type.
"[MATERIAL]" is Primary material or finish.
"[BACKGROUND]" is Background or surface.
"[LIGHTING]" is Lighting style.
"[ANGLE]" is Camera angle or framing.

Now let's give these variables our values.

```
[PRODUCT] = "[PRODUCT]"  
[TYPE] = "[TYPE]"  
[MATERIAL] = "[MATERIAL]"  
[BACKGROUND] = "[BACKGROUND]"  
[LIGHTING] = "[LIGHTING]"  
[ANGLE] = "[ANGLE]"
```

A commercial product photograph of [PRODUCT], a [TYPE] made of [MATERIAL], positioned on [BACKGROUND]. The product is upright, centered, and perfectly in focus. [LIGHTING] eliminates harsh shadows while maintaining subtle definition on the [MATERIAL] surface. Beautiful reflective highlights on the material. Shot [ANGLE]. Amazon main-image quality, no props, no shadows.

#2 *Amazon hero studio · specular highlights shadow ground*

We'll be creating an AI image prompt.
First, let's define some variables.

"[PRODUCT]" is Product name or brand.
